Specifications and Services

The Port of Little Rock is a full intermodal bulk and breakbulk facility on the Arkansas River, that averages 30 barge calls per month. Barges are loaded and discharged at two separate dock locations. The main dock has two barge berths plus a dolphin/river conveyor barge berth and the slackwater dock has one barge berth. The port is located 113 river miles from the Mississippi River. It is served by two major railroad companies and a short line railroad that provides daily switching service. Truck access is excellent as the port is located approximately three miles from Interstates 40, 30 and 530. The Little Rock Harbor Service is located adjacent to the port offering switching and fleet services. Special services provided by the port include real time inventory control and product packaging.
